

PROBLEMS WE CAN ADDRESS:

Aging face

Aging of the skin is often associated with brown spots as well as loss of facial volume and an increase in skin folds and wrinkles. Those signs can be reduced through good skin care and technologies such as Cryotherapy, IPL Photorejuvenation, Photodynamic Therapy, Microdermabrasion, Fillers and Botox.

Getting red in the face

Rosacea is a common facial skin condition that usually begins as redness, like a blush, appearing on the face. It can present as persistent redness, broken blood vessels and acne like lesions. Consult our Rosacea clinic to take control of this problem through preventive measures, medical therapy and IPL treatments.

Too much sun over the years

Photodamage can appear on the face as brown sun freckles, broken blood vessels and wrinkles. It can lead to pre-cancerous rough spots called actinic keratoses as well as various types of treatable skin cancers. TAKE ACTION - have a complete assessment and find out more about preventive measures as well as medical and cosmetic treatments such as microdermabrasion, IPL Photorejuvenation and Photodynamic therapy.

Excess hair

After a medical assessment, IPL technology can remove unwanted hair from:

- Bikini line
- Chin
- Lower legs
- Upper lip
- Underarms
- And many more areas

DR. MICHAEL I. SINGER, MD., FRCP, CSPQ, DABD

Dr. Michael Singer is a dermatologist certified by the Collège des Médecins du Québec, The Royal College of Physicians and Surgeons of Canada as well as The American Board of Dermatology. He is on staff at the Jewish General Hospital and he is an Assistant Professor in the Department of Medicine at McGill University. He has been at the Brunswick Medical Center since 1996.

Dr. Singer obtained his Bachelor (1987) and medical degree (1991) from the University of Toronto. He completed his dermatology residency at McGill University (1995) and did a fellowship in Clinical Pharmacology related to dermatology at the University of Toronto (1996). He obtained his Laser and Intense Pulse Light (IPL) training through an apprenticeship at the renowned Laserderm clinic in Ottawa as well as advanced courses.

Dr. Singer has special interests in Rosacea, Rejuvenation of sun damaged and aged skin, excessive sweating and hair removal.

He has developed and provided educational programs for patients and medical colleagues, and he actively participates in clinical research.

Dr. Singer works closely with a team of nurses and medical aestheticians to provide the highest quality dermatology care.

TREATABLE CONDITIONS

We can help you with:

Rosacea, Telangiectasia / Broken blood vessels, Red Spots, Spider Angiomas, Spider leg veins, Venous lakes (lips), Scars

Aging face, Age spots, Brown spots, Skin discoloration, Facial growths, Wrinkles, Frown lines, Crow's feet (temples), Volume loss (face), Depressed cheeks, Prominent nasolabial folds, Marionnette lines, Fine lines, Rough and dull facial skin

Acne prone skin, Acne scars, Dilated pores, Oiliness, Stretch marks

Sun damage, Sun freckles, Solar Keratoses, Sun spots, Pre-cancers, Skin cancers

Unwanted hair

Excessive underarm sweating

SPECIFIC ADVANCED TREATMENTS OFFERED

Botox Cosmetic

Is a non-surgical injectable treatment to smooth larger wrinkles such as glabellar frown lines and crow's feet. It reduces the signs of aging and helps you attain a more youthful appearance.

Botox for Hyperhidrosis

Excessive underarm sweating is assessed for medical causes and is treated with topical agents or Botox injections.

IPL Photorejuvenation™

Like Laser, shines specific wavelengths of light onto the skin to dramatically reduce the signs of sun damage such as broken blood vessels and brown sun spots. With repeated treatments, fine wrinkles and pore size can also be improved.

IPL™ Hair Removal

Intense Pulsed Light technology offers a gentle, non-invasive, long lasting solution to unwanted hair.

Microdermabrasion

Is an effective and safe technique for reducing the appearance of whiteheads, fine lines, wrinkles and scars. The gentle and repeated crystal exfoliation of the skin leaves it feeling smooth with improved vitality and glow.

Photodynamic therapy

This procedure uses a medication called Levulan that is activated by IPL, or a blue light (Blu-U) to treat pre-cancerous sun spots, large oil glands, acne and more severe sun damage.

Chemical Peel (Biomedic LHA Peel)

This peeling frees the skin of dead cells and helps stimulate cellular renewal. Can rapidly restore a boost of radiance to your complexion, even out your skin texture, tighten pores, reduce the appearance of wrinkles and pigmentation spots and smooth out irregular skin texture.

Hyaluronic acid fillers (Juvéderm, Perlane and Restylane)

Loss of facial volume and deep facial wrinkles can be treated with Hyaluronic acid fillers. They are particularly helpful in reducing the folds between the nose and mouth, as well as the mouth and chin. They can also improve contour of and create fuller cheeks.

Sculptra / Poly-L-Lactic acid

Injectable filler that progressively helps lift, smooth and firm up your facial skin by gradually stimulating the production of your own collagen. Ideal for enhancement of cheeks. Results typically last 2 years or more.
